

The Art of Folding **RIG.801**

The **RIG. 801** is a new high-performance automatic folding unit from RIGOLI FIME

- ◆ Digital technology offers a wide range of folding options at truly impressive speed.
- ◆ The **RIG. 801** is the ideal solution to the requirements of a wide range of graphic studios and workshops.
- ◆ The **RIG. 801** is specially designed for users who, while not having a large volume of material to fold, still need to offer high-quality service without resorting to time-consuming manual folding.

Folds sheets up to 100 centimetres wide and unlimited length.

- folds sheets up to 100 centimetres wide and unlimited length in 4-metre sections
- real (not 'peak') throughput of about 8 A0 sheets a minute. Negligible pause between each fold - unlike competing models
- digital technology with four programmed folding modes:
 - A. **Presentation mode** - first and last folds form identical-width covers
 - B. **Filing mode** with projecting border of 20 mm (configurable for other widths)
 - C. **Parallel mode** with width of last fold unspecified
 - D. **Cross-fold mode** (max. A0) with second-pass fold adjustable from 280 to 310 mm
- width of fold adjustable in all modes from 175 to 215 mm in one-millimetre steps
- automatic measurement of copy length simplifies billing for service providers
- sheets may be aligned laterally or transversely before insertion
- back or front copy ejection depending on folding mode chosen
- special fitting for smooth operation with rolled-up sheets
- silent operation
- sturdy floor stand with castors
- small footprint - 128 X 90 X 104 cm. Net weight 120 kg
- power supply 220 V/50 Hz, s/phase - power consumption 270 Watt - 1.2 A
